

Movin' with Music is a six week session, for children 18 months up to 3 years old, which involves music experiences including playing, moving, listening, responding and singing to music. Music is a powerful tool! It helps with our attention span, turn taking and preschool readiness skills. Music helps build relationships. It creates a bond between parent and child, child to child, and child to teacher. Music also engages a child by gaining their attention and motivating them. And most importantly music is fun. I look forward to singing with you and movin' with music with you and your child.

Mini Music is a music program for ages 3 months through 18 months. This music program targets younger children to begin familiarizing them with music, exploring instruments, making fun sounds and moving their bodies!

All groups require a parent or caregiver to be present during the program. For more information on locations, days and times, please contact Carol Colombo, Music Therapist at [ccolombo@geaugadd.org](mailto:ccolombo@geaugadd.org).
